

<公開に至った経緯>

本公益提案の公開に先んじて提案者は 2025 年 8 月頃、かつての上司を通じて本提案と関連する患者安全上の提案を行いました。

その際、相手方からは「社内の関連部署」「複数関係者」「関係部所」等の表現を用いて、一定期間にわたり何らかの社内検討が行われた旨が示され、第一三共株式会社所属の方から、協業・提携には至らない旨のご連絡をいただきました。

一方で提案者が保有する記録上、具体的な検討主体、判断主体、検討資料、議事記録、および経営層への共有有無は明示されていません。

このため 2026 年 5 月に患者安全・公益性・第三者検証可能性・正本性を確保する目的で、第一三共株式会社オープンイノベーション窓口へ正式な共同研究提案として再提出しました。

以上が本提案を公開するに至った経緯です。

<Background to Publication>

Prior to publishing this public-interest proposal, around August 2025, the proposer submitted a patient-safety-related proposal, through a former supervisor, concerning issues related to the present proposal.

In response, the other party indicated, using expressions such as “relevant internal departments,” “multiple relevant parties,” and “relevant departments,” that some form of internal review had been conducted over a certain period of time. The proposer was subsequently informed by an individual affiliated with Daiichi Sankyo Co., Ltd. that the proposed collaboration or partnership would not proceed.

However, based on the records retained by the proposer, the specific reviewing body, decision-making authority, review materials, meeting records, and whether the matter was shared with senior management were not clearly identified.

For this reason, in May 2026, in order to ensure patient safety, public-interest value, third-party verifiability, and document authenticity, the proposer resubmitted the proposal as a formal joint research proposal through the Daiichi Sankyo Co., Ltd. Open Innovation Office.

The above summarizes the background leading to the publication of this proposal.
